

“ At Aesus we are not here to simply sell you machinery, we find you packaging solutions ”

Samantha Lewis
President & CEO

Aesus Packaging Systems is a leading provider of integrated packaging and processing solutions for various industries.

We specialize in offering a wide range of equipment, installation services, parts, and customer support for your packaging needs.

Our core business lines include Filling & Capping, Labeling & Coding, Shrink Labeling & Tunnels, and Product Handling.

Aesus Packaging Systems is known for their advanced and reliable packaging solutions, catering to a diverse customer base that includes Fortune 500 companies and smaller businesses worldwide.

The equipment and integrated solutions are technologically advanced and flexible, meeting the needs of different industries.

Operations Optimized: The One-Stop Solution for your Packaging Needs

Bottle Unscramblers

Optimize packaging processes by systematically arranging bulk containers. Boost efficiency, aligning bottles perfectly for filling and labeling for rapid production.

Liquid Filling

We excel in liquid filling applications and offer a complete range of automatic and semi-automatic filling systems.

Our liquid fillers are designed to accurately fill both non-viscous and viscous liquids into bottles, vials, and other formats.

Capping and Torquing

We offer best-in-class capping and torquing machines suitable for threaded, press-on, or crimped cappers. These machines ensure precise torque control for secure closures.

Conveyors and Accumulation Systems

We provide container handling and accumulators, as well as transport conveyors, to keep balanced packaging line operations.

Our automatic Pick-and-Place packaging solutions are designed for unstable containers.

Labeling

Our state-of-the-art labeling solutions utilize servo label applicators for superior placement repeatability.

We provide pressure-sensitive labeling machines for containers, cartons, trays, pouches and clamshells.

Banding and Sleeving

We offer a full range of automated, tamper-evident band and full body shrink sleeve applicators along with hybrid hot air and Patented steam shrink tunnels for reliable and efficient application.

Patented Hybrid Shrink Tunnels

Combining the best of both worlds, they deliver unparalleled efficiency, consistent shrink quality, and adaptability for diverse packaging needs.

At Aesus we offer a wide range of comprehensive packaging solutions tailored to meet the specific needs of various industries.

Complete Turn-Key Lines

We design and manufacture high quality packaging equipment to provide turnkey solutions for your entire packaging line. Our expertise ensures that the equipment is tailored to your industry requirements and needs.

Line Integration

We specialize in fully integrated packaging lines. With our extensive knowledge and resources, we can assess your unique needs and recommend the most suitable equipment for seamless integration.

More Solutions

Bottle Cleaners

Fully automated no-change-part changeovers. Integrate superior hygiene and eradicate contaminants, ensuring each bottle is pristine, pure, and ready for filling.

Solid Dose Counting & Filling

From pharmaceutical tablets to pouches or canister desiccants, we provide efficient solutions for solid dose product counting and handling.

Powder Filling

Our powder filling line includes auger fillers and dry fillers that can accommodate various production rates and product characteristics.

Scoop Inserter

Our machine precisely and automatically inserts scoops into containers, ensuring exact and convenient product measurement.

Desiccant Barrel Inserter

Efficiently insert desiccant barrels into containers for optimal product freshness and moisture protection with our advanced Desiccant Barrel Inserter.

Aesus Engineering

Crafting Tailored Packaging Equipment Solutions Just for You

In the dynamic world of packaging, one-size-fits-all simply doesn't cut it. At Aesus, we understand the unique challenges you face daily. That's why our Engineering Department is entirely dedicated to delivering tailored equipment solutions designed around your operations.

Precision-Driven Customization

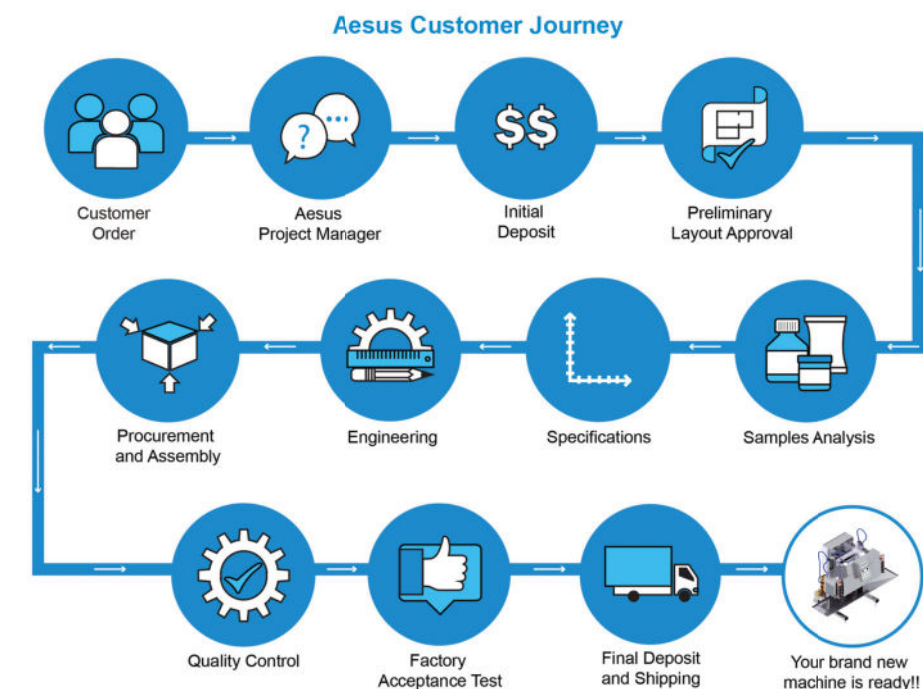

Every product has its unique packaging requirements, and we're here to cater to them all.

Our engineers dive deep into understanding your product, its lifecycle, and your brand's promise to ensure that the equipment solutions we craft resonate with your operational needs.

Robust, Yet Flexible

Durability doesn't have to come at the cost of adaptability.

Aesus engineering strikes the perfect balance. Our solutions are built to last while offering the flexibility to adapt to changing packaging needs, ensuring a future-proof operation for you.

When you envision, we engineer.

Cutting-Edge Technological Integration

In an era where technology drives efficiency, our engineering team is consistently at the forefront.

By integrating the latest automation, AI, and IoT solutions, we ensure your packaging line is not just state-of-the-art but also optimally efficient.

Collaborative Approach

Your insights are the blueprint for our designs.

The Aesus engineering team actively collaborates with your operations team, taking feedback, iterating, and refining to make sure the end solution seamlessly aligns with your vision.

The essence of our commitment lies in the deep partnerships we foster.

Through cutting-edge design, adaptability, and a keen ear for your needs, Aesus engineering pledges to stand by you, turning challenges into triumphs.

AesusCare

Service & Spares: Tailored Support for Leaders Like You

Driving the helm of operations is no small feat. You manage complex processes, tight schedules, and deliver quality consistently. Recognizing your pivotal role, Aesus' Service and Spares department is tailored to offer you unparalleled support. Here's our promise to you:

Always-On Assistance

Operational challenges recognize no time bounds, and neither do we. At any moment, find an Aesus specialist awaiting your call, ready to resolve, reassure, and reignite your operations.

Commitment to Quality

Compromise isn't in our vocabulary. We stock our spares inventory with the industry's premium, genuine parts. The result? Swift, efficient replacements, keeping your assembly line in perpetual motion.

On-the-Ground Support

Beyond just over-the-phone guidance, our seasoned technicians can be at your facility, standing shoulder-to-shoulder with your team. From hands-on troubleshooting to on-site training, we're there, right in the thick of it with you.

Forward-Thinking Maintenance

Why react when you can prevent? Our department not only offers solutions but anticipates potential setbacks. Through periodic reviews and proactive measures, we aim to keep your operations in their prime.

Evolving with Your Feedback

Your insights shape our service. Share with us any experiences, suggestions, or aspirations, and watch us mold our services to match your vision even more closely.

At Aesus, we don't merely serve; we partner. Our Service and Spares department is your extended team, ensuring smooth, efficient, and progressive operations.

Your Next Step Forward

Why Choose Aesus?

Innovation

We lead the industry with state-of-the-art solutions.

Experience

Years of excellence delivering quality and reliability.

Partnership

We're not just vendors; we're your partners in success.

Ready to Transform Your Packaging Experience?

Contact Our Experts

Don't leave your questions unanswered. Reach out and let our team guide you to the best solutions.

Schedule a Demo

Seeing is believing. Book a demonstration and witness our machinery's prowess firsthand.
