

## ECO-Series Labelers

Economical Labelers for Wrap Around, Panel, Front, Back, Top, Bottom, Side and other pressure sensitive labeling applications.

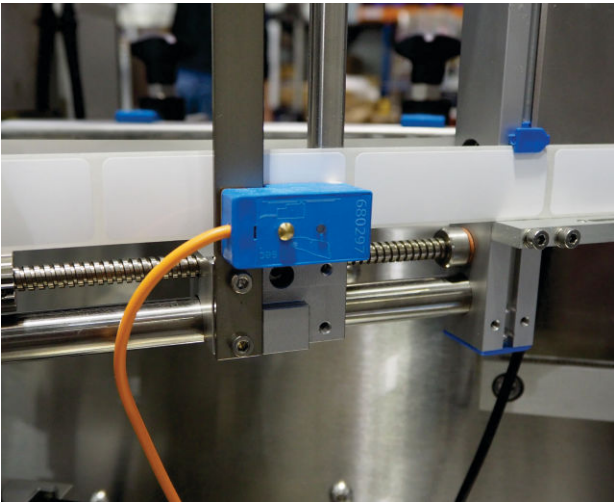

For the budget conscious, the Eco-Wrap is equipped with the world's most popular Servo labeling applicator, (left hand or right hand head) These heads are rugged and reliable and can dispense over 30 meters/min! (1ft/sec!) Product detector for start signal, peel off plate for labels up to 6" tall (standard, taller available) The same powerful Servo head as on our superior models but excluding many bells and whistles resulting in a cost effective automatic wrap labeler.

Our Eco Series cuts out the frills but gives super consistent Labeling at a very affordable price!

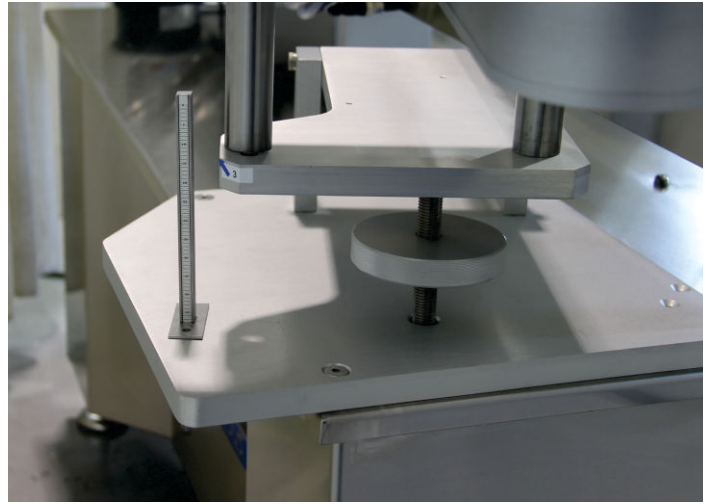

The Eco Panel is shown with optional extended conveyor, PLC control with a Color touchscreen, Servo controlled top hold down belt, servo controlled feed screw, Wrap Belt for round containers, and a Prism Roller aligner.

## Patented Label Sensor

Patented Inductive label sensor eliminates the need to play with photo electric sensors which can accumulate dust.

## Standard Tilt adjuster

A nice touch on the Aesus Eco labelers is the Tilt adjuster with graduated scale to fine tune the angle of the label head to match the container precisely.

## Optional Bottle Separator

For speeds up to 120 per minute the Star Prism holds the container, spins it, (aligns it to a mark if needed), applies the label(s) and indexes it.

## Perfect for the role

An Exclusive feature

Is the twist on/twist off Core and rewind holders. Just twist a knob and the core is released to load fresh Labels.

The same system for the backing paper. Just the faster label changes will probably pay for your Head!

## Prism Aligners

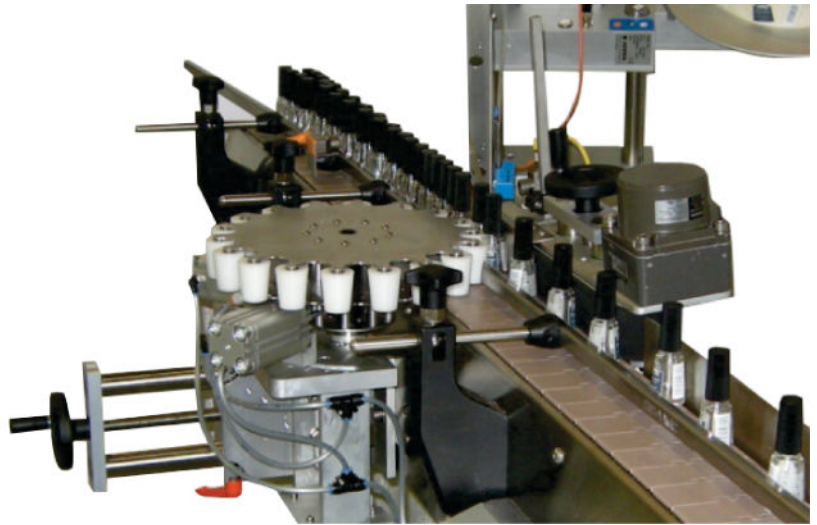

## Optional Aesus Prism Aligner

A Prism aligner can ensure supreme accuracy. Two rollers press the container against the wrap belt to align and rotate it a fraction of a second before the label is inserted.

## High speed Star Prism System

(US Patent 8156987)

To separate containers, the Aesus separator is extremely compact with a handwheel to adjust its position precisely.

Prism alignment is for long labels where perfect alignment is required, two labels (front and back) on the same roll, alignment of a handle etc. with the label.

## Other Optional Items

### Label Handling Options

- Oversize infeed reels
- Tall label extenders
- Motorized power rewind
- Motorized power unwind
- Low and broken web detectors
- Hot Stamp Coder
- Thermal Printers
- Missing Label Detector
- Luminescence Detector
- Bar Code Readers

## Container Handling Options

- Prism roller system
- Tall Wrap Belts
- Reject Station
- Product Aligner - Belt System
- Product Aligner - Worm System

### More Options

- Safety Guarding
- Extended Conveyor
- Verification System
- Vision Systems
- Other Voltages

Packaging Systems

## Some other configurations of Aesus Eco Series Labelers

### EcoTop

For labeling the top of containers, boxes, bags, lids...

### EcoSide

For labeling the side of milk jugs or containers, boxes, etc.....

### EcoClamShell

For labeling the top and side (and/or bottom) of clam shells or blisterpacks.

### EcoWrap

with a printer to print variable information on preprinted labels.

### EcoBottom

For labeling the bottom of containers, boxes, bags, etc.

### EcoWrap
